

Customer-specific extrusions and standard profiles

## 5-AXIS MACHINING (CNC)

*Complex 5-axis machining of bent and straight aluminium profiles.*

For the most complex milling operations, Kersten has an extensive range of machines in which profiles with very diverse and large cross-sections are machined in 5-axis in a single setup.

### CAPACITIES

Our 5-axis machining centres have a capacity of:

- X-axis (length) - 4800mm
- Y-axis (width) - 3000mm
- Z-axis (height) - 1200mm

### ADVANTAGES OF 5-AXIS MACHINING

- Fast and efficient process
- Complex (3D) cut-outs
- Precise tolerances
- For both curved and straight aluminium profiles

### OTHER SERVICES

- Material procurement
- Engineering
- Project management
- Bending, welding, assembly, heat and surface treatment, 3D measuring
