

Energy & Offshore projects

Track record

Proven experience in Energy & Offshore

For more than 60 years, Kersten has been supplying **curved components and fabricated constructions for energy and offshore projects worldwide.**

With extensive in-house capabilities in bending, plate rolling, cutting, machining, welding and assembly, we support our customers from individual curved components to complete, ready-to-install constructions.

Our experience covers a wide range of offshore components and sub-assemblies, including:

- J-tube assemblies
- Cans and cones
- Conductor guides
- Pin piles and pile sleeves
- Tubulars and spud piles
- Bellmouths
- Ring beams
- Cylinders and rolled shells
- Customer-specific offshore constructions

Our components are used in demanding offshore structures and energy applications, including **jackets, monopiles, transition pieces, floaters and other foundation and support structures.**

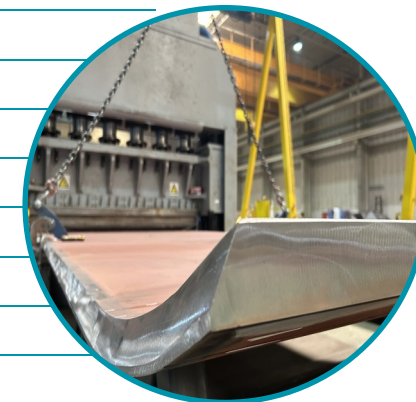

From one-off components to complex fabricated assemblies, we combine **bending expertise with extensive fabrication capabilities** to deliver components ready for the next stage of your project.
